KEYNOTE

Advanced multilevel metallization technology
T. Ohba 1

SILICIDES

Ti/Co bilayers in salicide technology: electrical evaluation
A. Lauwers, Q.F. Wang, B. Deweerdt and K. Maex 12

Improved thermal stability of cobalt silicide formed by ion beam assisted deposition on polysilicon
S. Ravesi, F. La Via, V. Raineri and C. Spinella 19

Epitaxy of $CoSi_2$/Si(100): from Co/Ti/Si(100) to reactive deposition epitaxy
A. Vantomme, S. Degroote, J. Dekoster and G. Langouche 24

Experimental identification of the optical phonon of $CoSi_2$ in the infrared
S. Bocelli, G. Guizzetti, F. Marabelli, G. Thungström and C.S. Petersson 30

The modelling routes for the chemical vapour deposition process: application to $Si_{1-x}Ge_x$ deposition
M. Pons, C. Bernard, H. Rouch and R. Madar 34

Comparison of $CoSi_2$ interconnection lines on crystalline and noncrystalline silicon fabricated by writing focused ion beam implantation
J. Teichert, L. Bischoff, E. Hesse, P. Schneider, D. Panknin, T. Gessner, B. Löbner and N. Zichner 44

Beam induced phase transformations and self annealing in as-implanted iron silicides
G. Crecelius, K. Radermacher, Ch. Dieker and S. Mesters 50

Electrical and optical properties of thin $Fe_{1-x}Co_xSi_2$ films
S. Teichert, R. Kilper, T. Franke, J. Erben, P. Häussler, W. Henrion, H. Lange and D. Panknin 56

Ni silicides formation and properties in RF sputtered Ni_{100-x}–Si_x thin films
A. Belu-Marian, M.D. Serbanescu, R. Manaila and A. Devenyi 63

Raman study of tetragonal tungsten disilicide
O. Chaix-Pluchery, F. Genet, G. Lucazeau and R. Madar 68

Cubic metastable $FeSi_{1-x}$ epitaxially grown on Si and MgO substrates
S. Degroote, A. Vantomme, J. Dekoster and G. Langouche 72

Formation of $CoSi_2$ on strained $Si_{0.8}Ge_{0.2}$ using a sacrificial Si layer
R.A. Donaton, S. Kolodinski, M. Caymax, P. Roussel, H. Bender, B. Brijs and K. Maex 77

Some physical properties of $ReSi_{1.75}$ single crystals
U. Gottlieb, M. Affronte, F. Nava, O. Laborde, A. Sulpice and R. Madar 82

Electrical and optical properties of thin β-$FeSi_2$ films on Al_2O_3 substrates
K. Herz and M. Powalla 87

Photoelectron spectroscopic investigations of thin Fe_xSi_{100-x} films
R. Kilper, St. Teichert, Th. Franke, P. Häussler, H.-G. Boyen, A. Cossy-Favre and P. Oelhafen 93

Angular dependence of the magnetoresistance of $TiSi_2$ single crystals
M. Affronte, O. Laborde, U. Gottlieb, O. Thomas and R. Madar 98

Phonon dispersion relations of metallic $NiSi_2$ and $CoSi_2$ by semi-empirical tight-binding calculation
S. Sanguinetti, C. Calegari and L. Miglio 103

Metallurgical and electrical investigation of Pt_5Ni_{95}/silicon interactions
F. Corni, C. Nobili, G. Ottaviani, R. Tonini, B. Grignaffini Gregorio and G. Queirolo 107

METALS FOR INTERCONNECTS

Advanced copper interconnections for silicon CMOS technologies
J. Torres 112

Electroless copper metallisation of titanium nitride
J.C. Patterson, C. Ni Dheasuna, J. Barrett, T.R. Spalding, M. O'Reilly, X. Jiang and G.M. Crean 124

Process optimization of copper MOCVD using modeling experimental design
M.-J. Mouche, J.-L. Mermet, F. Pires, E. Richard, J. Torres, J. Palleau and F. Braud 129

Structure and electrical properties of thin copper films deposited by MOCVD
J. Röber, C. Kaufmann and T. Gessner 134

Patterning of copper for multilevel metallization: reactive ion etching and chemical–mechanical polishing
C. Steinbrüchel 139

Effects of the biasing frequency on RIE of Cu in a Cl_2-based discharge
A. Bertz, T. Werner, N. Hille and T. Gessner 147

Investigation of the oxidation behaviour of thin film and bulk copper
M. O'Reilly, X. Jiang, J.T. Beechinor, S. Lynch, C. Ní Dheasuna, J.C. Patterson and G.M. Crean 152

Nucleation and growth of CVD-W on TiN studied by X-ray fluorescence spectrometry
M.S. Marangon, G. Queirolo and C. Savoia 157

Influence of mixed reductants on the growth rate of WF_6-based W-CVD
J.F. Jongste, T.G.M. Oosterlaken, G.J. Leusink, C.A. van der Jeugd, G.C.A.M. Janssen and S. Radelaar 162

Cluster beams for metallization of microstructured surfaces
P. Gatz and O.F. Hagena 169

Thermodynamic and experimental study of Cu-LPCVD by reduction of copper chloride
N. Bourhila, N. Thomas, J. Palleau, J. Torres, C. Bernard and R. Madar 175

Some particular features of the condensation process, structure and properties of thin metal films caused by self-ion bombardment
I.V. Gusev, A.A. Mohnjuk, V.I. Chapljuk and V.P. Belevsky 182

Precursor development for the chemical vapor deposition of aluminium, copper and palladium
A. Gräfe, R. Heinen, F. Klein, Th. Kruck, M. Scherer and M. Schober 187

Chemical mechanical polishing of copper for multilevel metallization
Z. Stavreva, D. Zeidler, M. Plötner and K. Drescher 192

RELIABILITY AND STABILITY OF INTERCONNECTS

Stress voiding and electromigration phenomena in aluminum alloys
S. Kordic, R.A. Augur, A.G. Dirks and R.A.M. Wolters 197

Influence of the anti reflective coating on the electromigration resistance of 0.5 μm technology metal-2 line structures
R. Stevens, A. Witvrouw, Ph.J. Roussel, K. Maex, H. Meynen and A. Cuthbertson 208

Stress in Al, AlSiCu, and AlVPd films on oxidized Si substrates
G.J. Leusink, J.P. Lokker, M.J.C. van den Homberg, J.F. Jongste, T.G.M. Oosterlaken, G.C.A.M. Janssen and S. Radelaar 215

Interaction of a void and a grain boundary under a high electric current stress employing three-dimensional molecular dynamics simulation
S. Shingubara, I. Utsunomiya and T. Takahagi 220

Electromigration resistance of TiWN/Cu/TiWN interconnections
T. Fukada, T. Mori, Y. Toyoda, M. Hasegawa, K. Namba and K. Ogata 227

Model calculations on a bipolar transistor emitter interconnection with different contact shapes
K. Weide, J. Ullmann and W. Hasse 234

The effect of ion implantation on the properties of Al films
M. Zaborowski, A. Barcz, G. Gawlik and I.W. Rangelow 239

Hillock recognition by digital image processing
M. Zaborowski, M. Adamiec and A. Barcz 246

BARRIER LAYERS

Ti-diffusion barrier in Cu-based metallization
F. Braud, J. Torres, J. Palleau, J.L. Mermet and M.J. Mouche 251

Sputtering of tantalum-based diffusion barriers in Si/Cu metallization: effects of gas pressure and composition
M. Stavrev, C. Wenzel, A. Möller and K. Drescher 257

Co-sputtered TiB_2 as a diffusion barrier for advanced microelectronics with Cu metallization
G. Sade and J. Pelleg 263

Ternary amorphous metallic thin films as diffusion barriers for Cu metallization
M.-A. Nicolet 269

LPCVD $Re_xSi_yN_z$ diffusion barriers in $Si/SiO_2/Cu$ metallizations
A.-M. Dutron, E. Blanquet, C. Bernard, A. Bachli and R. Madar 277

Electrical characterization of conductive and non-conductive barrier layers for Cu-metallization
C. Ahrens, D. Depta, F. Schitthelm and S. Wilhelm 285

Electrical characterization of reactively sputtered TiN diffusion barrier layers for copper metallization
C. Kaufmann, J. Baumann, T. Gessner, T. Raschke, M. Rennau and N. Zichner 291

Ti nitride phases in thin films deposited by DC magnetron sputtering
R. Manaila, D. Biro, P.B. Barna, M. Adamik, F. Zavaliche, S. Craciun and A. Devenyi 295

Barrier behaviour of plasma deposited silicon oxide and nitride against Cu diffusion
M. Vogt and K. Drescher 303

Integration of a TiN barrier layer formed by rapid thermal annealing in a 1 μm CMOS process
K.-H. Stegemann, V. Heinig, G. Fontaine, J. Palorec and C. Beyer 308

Aspects of TiN and Ti deposition in an ECR plasma enhanced CVD process
A. Weber, R. Nikulski, C.-P. Klages, M.E. Gross, R.M. Charatan, R.L. Opilan and W.L. Brown 314

CONTACT AND VIA PROBLEMS

3D simulation of tungsten low-pressure chemical vapor deposition in contact holes
E. Bär and J. Lorenz 321

Evaluation of selective tungsten plugs on TiN, W and AlSi by analytical and electrical measurements
S.E. Schulz, B. Hintze, W. Grünewald, O. Fiedler and T. Gessner 326

Growth rate modeling for selective tungsten LPCVD
H. Wolf, R. Streiter, S.E. Schulz and T. Gessner 332

Selective deposition of tungsten on ITM-$CoSi_2$
J.D. Kähler, D. Depta and R. Ferretti 339

W/Si Schottky diodes: effect of sputtering deposition conditions on the barrier height
M. Mamor, E. Dufour-Gergam, L. Finkman, G. Tremblay, F. Meyer and K. Bouziane 342

Ohmic contacts to p-type 6H-silicon carbide
O. Nennewitz, L. Spiess and V. Breternitz 347

The ohmic contact to the silicon Schottky barrier using vanadium silicide and gold or silver metallization
A.D. Remenyuk and N.M. Schmidt 352

Electrical characteristics of aluminum contacts to porous silicon
S.P. Zimin, V.S. Kuznetsov and A.V. Prokaznikov 355

PROCESS INTEGRATION

Advanced metallization technology for 256M DRAM
P. Kücher, H. Aochi, J. Gambino, T. Licata, T. Matsuda, S. Nguyen, M. Okazaki, H. Palm and M. Ronay 359

Inter-metal dielectric planarization process for 0.35 μm multilevel interconnection devices
M. Bacchetta, C. Zaccherini and L. Zanotti 367

A highly reliable, low cost 0.5 μm three level tungsten metallization
M. Hain, H. Körner, B. Neureither and S. Röhl 374

On the formation of silicides on poly runners with topography by a two-step silicidation process
F. Jonckx, R. Verbeeck, B. Deweerdt and K. Maex 378

Deposition of titanium nitride/tungsten layers for application in vertically integrated circuits technology
G. Ruhl, B. Fröschle, P. Ramm, A. Intemann and W. Pamler 382

Author index 388
